

WORLD HAPPENINGS
BRIEFLY TOLD

Reports being prepared by J. T. Soper on Canadian expeditions to the Arctic, will be complete in 1935.

Rev. John Carter, 65 years of age, son of John Carter, Toronto, has been elected mayor of Oxford.

H. J. Brown, meteorologist of Washington, D.C., predicts 1935 will be a year without a summer witheringly almost impossible.

The new Canadian Red Cross Hospital was formally opened at Eagle, Ont., by Hon. Lincoln Field, provincial secretary.

More than 400,000 people travelled by water between Canada and the United States during the year ending June 30th, research bureau shipping board records reveal.

A memorial tablet to the late Sir William Price was unveiled at the Anglican memorial service held in St. James' Anglican Church at Kenogami, Nov. 8.

With the 1935 season of navigation getting on and statistics compiled at the port of Quebec show that 78,283 passengers were landed up to Nov. 7, and that for Canada and the United States.

Sir Horace Rumbold, British ambassador to Madrid, will head the commission of the League of Nations which will inquire into the reasons for the fighting between the Italians and the Greeks recently.

The Manitoba Power Company will spend \$2,000,000 in new equipment and transmission lines following successful negotiations with the province for the Manitoba Pulp and Paper Company's investment in Canada.

The "death ray" inventor can make made come from behind of the fact. Dr. Orndell Matthews has shown how his luncheon works. He also has a device for advertising in colors in the clouds.

After working on his invention for fifty years, John Smith, engineer of Winnipeg, claims to have perfected a "stationary engine capable of controlling and producing its own, self-maintained power." He has a "perfect model" on demonstration.

Vice-Admiral Sir Roger Keyes, commander-in-chief of the British Mediterranean fleet, was slightly injured when an aeroplane in which he was riding crashed into the sea. The pilot and another officer in the plane suffered slight cuts and bruises.

Big Slump In Shipbuilding

Industry Suffers Most Decided Drop Since Great War

Shipbuilding throughout the world suffered its most decided slump since the war during the 1934-1935 period, department of commerce announcements recently.

Reports for the third quarter of 1935, ended Sept. 30, received from Lloyd's Register, showed a drop of more than 150,000 tons.

Motor vessels declined 45,000 tons during this period, construction of other classes of ships, it was stated, had been decreasing.

Construction in this country dropped 25,000 tons, while the decrease in Great Britain and Ireland was reported to be \$4,000 tons. The largest decrease was from transport, with a 100,000-ton drop. France declined 19,000 tons and Denmark 7,000 tons.

Italy and Holland showed the only increases in work started during this period.

May Be Important Discovery

Cancer Surgery Is Cured By Lead Say Liverpool Professor

Selecting a leading figure from the Academy of Medicine for an announcement of world-wide interest to the medical profession and victims of cancer, Prof. W. H. R. Roper, of Liverpool University, and honorary director of the Liverpool Cancer Research Institute, told leading surgeons of the city of the successful treatment of the dread disease by the chemical agent, lead. He cited several instances in which remarkable cures had been achieved, and assured the members of the academy that 50 or so patients were believed to be well, out of the 200—mostly hopeless cases—treated.

Many Savings Accounts

There were 10,616 savings accounts in Hawaii banks during the past year, totalling \$1,048,271.75. Anglo-Spanish accounts registered the highest total, while savings deposited by Japanese increased more than \$1,000,000 over the previous year.

Remember there is a limit to human endurance. The friend who stands up for you may tire in the course of time and sit down.

Wide Phone Service

Long Distance Service In Alberta Has Been Made Convenient-Wide

With due ceremony, the inauguration of the continent-wide telephone service from Alberta was celebrated recently, when Governor Brett of Alberta conversed over the long distance telephone with state officials in the states of Montana, Colorado and Arizona, and with Chief Justice MacInnis at Ottawa, Ontario. The inauguration of this service, by which Alberta telephone subscribers will be able to converse with any point in the United States and with many points in Eastern and Western Canada, and on the coast, was made possible through the co-operation of the Mountain States Telephone Company with the Alberta Government Telephones. Repeaters have been installed at Lethbridge, Calgary and Medicine Hat, and copper circuits set up from Lethbridge to the boundary of Montana, linking up with copper circuits extended north from Shelby, Montana. This has made possible the connection with the transcontinental system in the States.

In connection with the historical fact taken by the Alberta Government telephone, it is interesting to note that long distance service in the province has grown from 1,000,000 in 2,500,000 calls in the past ten years, and that in the last revenue from long distance service has grown from \$32,300 per annum to over \$1,000,000 per annum.

The first commercial call over the new universal system was given from Edmonton, when a resident of Edmonton conversed with a friend in Minneapolis, Minnesota.

Advance In Medical Science

Toronto Doctor Announces New Serum

For High Blood Pressure

A new serum which may reduce the mortality of high blood pressure, was described by Dr. F. H. G. Starr, of Toronto, Canada, in an address before the clinical congress of the American College of Surgeons, Philadelphia.

Dr. Starr said that William J. McDonald had been working on the serum in the research laboratories of the University of Toronto for some time, but that it had not yet reached a point to permit a detailed description or an optimistic statement of its probable efficacy. The serum was said to be a liver extract. High blood pressure, he explained, usually was due to hardening of the arteries, which in turn was due to an inflammation, possibly of germ origin.

Edmonton Attains Majority

Was Officially Created a City on Nov. 7, 1904

Edmonton became an adult among cities on Nov. 7.

Just at the close of the year, on November 7, 1904, Edmonton was officially created a city. Since that date the population has grown from 1,666 to 65,735.

There are 20,000 residents in the city daily, as compared with when 400; 12,481 telephones in use where 400; 1,000 houses where 400.

The fur trade and the Klondike rush put the city on the map in the early days.

Now it is the legislative and educational centre of the province and the distributing point for Central and Northern Alberta, as well as the gateway to the Arctic fur lands.

New Colonization Plan

Community Move of British Settlers to Canada Is Proposed

While the department of immigration is working with the overseas settlement board on a full cooperative plan for the purpose of increasing immigration to Canada from the United Kingdom, dual was made at the department of any personal knowledge or official connection with any scheme of colonization, reported from London, calling for the migration of 20,000 British to the Dominion within a period of five years.

These families, according to the scheme, would be settled on Canadian farms in communities, and not in colonies.

Aches of Climber Staggered

From the summit of one of the highest mountains in the lake district, north of Bradford, the renowned alpinist of Reynard Gough was scattered to the wind as a biting funeral rite for a mountain climber, Mr. Gough, who for 33 years was headmaster of Tanton's School, Southampton, has been noted as a mountain climber for many years. Pulley climbers conducted the funeral service.

She: "My father gives me a dollar every birthday. I have now eighteen."

He: "How much does he still owe you?"

Many a woman uses make-up merely because she hasn't the cheek to do without it.

A Western Editor M.P.

Camron R. McIntosh, D.A., Liberal member for North Battleford, is the only editor which Western Canada is sending to Ottawa.

Mr. McIntosh publishes three weekly newspapers, The North Battleford News, The Battleford Record and the St. Walburg Times. Mr. McIntosh has been an active member of the Saskatchewan Press Association since it was first formed, and on the executive since it had an executive, serving several terms as president. He was one of the Saskatchewan editors who went over to the European continent with the Canadian Weekly Newspaper excursion in 1924 and were honored in most of the capitals of Europe, and entertained by royalty in Great Britain and Belgium, and by Marshal Poch in Paris. He is an enthusiastic Canadian Club member, organizer and president of the Canadian Club of the Battleford, and for two years represented Saskatchewan as vice-president on the national executive of the Canadian Club of Canada.

Circles Globe in Small Boat

"Liberty Navigator" Travels 38,000 Miles in Homemade Craft

Circumnavigation of the globe in a 21-foot boat was accomplished by Harry Piguen, 54 year old photographer, of San Pedro, Calif., who set out on his homesteaded craft, the "Liberty Navigator." He made port at San Pedro, Calif., after travelling 38,000 miles in his homesteaded craft, the "Liberty Navigator," which he set out on San Pedro, November 18, 1931.

The "Liberty Navigator" was a 21-foot boat, built by Harry Piguen, 54 year old photographer, of San Pedro, Calif., who set out on his homesteaded craft, the "Liberty Navigator," which he set out on San Pedro, November 18, 1931.

Surgeons Revert To Old Practice

Doctor at Johns Hopkins College Tells New Injections Purify Blood

Modern surgeons have partially reverted to a practice of the Dark Ages, when blood letting and leeches were considered the most efficacious of remedies.

The medical wizards of those ages believed the blood stream carried all diseases. When a man in those days had a fever, a cold, or affliction of any sort, a "chirurgian" was called in and his main task was to bleed the patient.

But, although modern science has returned in part to this practice it is finding also that the blood stream can be purified with powerful injections—known as diathermies.

All this was brought out by Dr. Hugh M. Young, Johns Hopkins Medical College, in explaining the work undertaken by the American College of Surgeons in the formation of a committee on antiseptics, of which Dr. Young is chairman, to gather material for a vast symposium on modern, antiseptic surgery.

This work is undertaken as a memorial to Lister, the hundredth anniversary of whose birth was celebrated April 15, 1927. Lister, working on Pasteur's theory of the germ origin of infection, by his antiseptic discoveries, laid the foundation for modern surgery.

Radio Plays A Great Part In Keeping The Western Farmer In Touch With World At Large

The popularity achieved by radio in Canada is as great as it is to be found in any other country and greater than in most. The general adoption and rapid expansion are but further indications of Canada's position in the forefront with those countries developing along modern lines, and lending impetus to national progress. Radio has sensationally swept over the country, capturing all sections of the Dominion and entering most intimately into the country's commercial, business and social life. In its peculiar role, it is certain phases of Canadian life radio would seem to have imparted greater benefits than elsewhere.

Radio licenses were issued by the department of marines and fisheries during the twelve months ending March, 1935, to 91,874, and the number of stations has increased to 41,847, followed by Quebec with a total of 41,847. Installations in other provinces were: Saskatchewan, 1,247; Manitoba, 6,553; British Columbia, 6,405; Alberta, 1,415; Nova Scotia, 2,772; New Brunswick, 1,247. The number of stations in the Dominion numbered at the end of the year.

The number of licenses issued in the marine service is striking, considering the sales manager of a leading company, the west in Canada's radio field, and private farmers 2 more acts than any other class of people. Radio is playing a great part in the life of the Western Canadian farmer and he is to be commended for his attitude. In the past, the latest market reports which the diversions of cities can be brought at will to his isolated home. In the war and immediate post-war years the general adoption of the automobile in Western Canada did a great deal to revolutionize the life of the Western Canadian farmer, and now the same weaving progress of the radio has further increased his disadvantage may be expected to be nullified by reason of his position and imparted something useful and peculiarly enjoyable in the way of closer farming.

Cattle Plague Is Spreading In England

Famous Westminster Fair Canceled For First Time In 400 Years

The Prince of Wales may be to abandon his foot hitting this season owing to the spread of foot and mouth disease and public interest in the epidemic, which is affecting 13 counties, centres on this feature.

Hunting is not allowed in the affected areas because it is believed that horses and dogs crossing over pastures carry the infection with them. Officials of the ministry of agriculture are investigating a theory that automobiles are also carriers of the disease. They believe that mud-covered automobile wheels spread the cattle scourge, especially manure, carrying from the continent where the disease is prevalent.

Several cattle shows have been abandoned, including the famous Westminster fair in Wiltshire, which has been held each year without interruption for 400 years.

Advertising Creates Demand For Fish

Publicity Campaign of Last Few Years Produces Results

"If every Nova Scotia fishing boat and every Nova Scotia fisherman were to work the full limit of their capacity for the next six months they would be unable to supply the demand that has been created as a result of the intensive newspaper advertising campaign that has been carried on by the fishing industry," declared Arthur Houshelly, president of the Canadian Fishermen's Association, addressing the Rotary Club on "National Fish Day." Mr. Houshelly gave a brief history of the advertising campaign started some years ago by the fishing industry of Canada, and which, he said, had created an unprecedented demand for fish food in Canada.

Obliging
Prison Governor (to released convict): "You sorry! I find we have kept you here a week too long!"
Convict: "That's all right. Apologize if not next time!"

Student: "They hanged her in China."
Teacher: "Shanghai!"
Student: "Now very."

W. N. U. 1935

Triumph For Alberta Butter Wins First Prize and Gold Medal At London Dairy Show

The greatest triumph yet scored by Alberta creamery butter in competition, was recorded recently, when it was awarded the first prize and gold medal in the world, at the London dairy show, one of the largest shows of its kind in the world. This means that this exhibit from Alberta stood ahead of all other exhibits from other parts of the British empire, not including British Isles.

Two other exhibits from Alberta, made from that of the Woodland Dairy at Edmonton, and the Imperial Creamery, were given high commendation in the show. The first prize in the standard butter section went to the Co-operative Creameries of Regina, Saskatchewan.

In the condensed section of the show, Canada won four out of the six prizes offered for empire-wide competition, and Western Canada took three out of the six. This means that Western Canada creamery butter is recognized in the most discriminating market in the world, as the highest quality of butter produced in any of the British dominions.

The exhibits from Alberta in the standard section were made under the supervision of the dairy branch of the provincial department of agriculture, which gave substantial assistance to the exhibitors in enabling them to make the long journey. It is the first time that Alberta has exhibited in the London show, and it is regarded as a unique triumph for the Alberta dairy industry that the gold medal came to this province, even beating out in competition the famous New Zealand exhibitors, which is made under almost perfect conditions.

Naturally, there is considerable pride among Canadian dairymen over the fact that Alberta butter has scored so highly. The grading system in force in the province has been considered to do with the rapid improvement of quality of the butter manufactured in the plants in Alberta, and with the latest triumph Alberta butter is likely to be more in demand than ever in the British market, where last year a considerable quantity was sold.

New Varieties Of Wheat

Two Have Been Tested At University Of Alberta

The University of Alberta has been paying special attention to two new varieties of wheat which, it is thought, will meet the requirements of certain districts better than Marquis.

Renfrew wheat is later and higher yielding than Marquis and will likely be suited to southern areas of the province where there is a limited rainfall. It does not seem advisable to grow it in the Edmonton district or in northern areas where frost has to be reckoned with.

Another variety, University No. 225, is entirely hardier and resembles Red Ruby from which it was selected. It is about four days earlier than Marquis and its tests on the University farm at Edmonton has given better yields. The shortness of the straw is a disadvantage in the drier areas.

Drops Coarse Grain Pool

Alberta Board of Directors Decide Against Project For This Year

The Alberta Wheat Pool will not promote a pool of coarse grain this year. At a meeting of the board of directors of the pool held in Calgary, it was decided that the number of contracts received in response to the inquiry sent out by the board was not sufficient to warrant organization for the present season at least.

Accordingly all contracts signed by those wishing to have a coarse grain pool, have been declared void and official notification of the board's decision will be sent to every farmer who signed a contract under the provisional terms of the proposed pool.

Canned Goods From Coast Province

The Occidental Fruit Company is shipping from Melbourne on an average two cars of canned goods daily to grade points, as well as four cars of produce, and the latter is being included export shipments of apples to Great Britain and New Zealand and other foreign markets. The company has two cars of fruit and vegetable daily.

And in Japan, bread is brought in by the ship. And maybe they say inches is better than none.

Was Elected President

Good Attendance at Ninth Annual Convention in Regina

The Ninth Annual Conventions of the Saskatchewan Division of the Canadian Weekly Newspaper Association was held at Regina, on Thursday and Friday, Nov. 6 and 7, and was an unqualified success. A large representative attendance was attracted from every corner of the province, and the last session proved most helpful. The delegates received an official welcome from Mayor Mason, who handed over the keys of the city. The Saskatchewan Co-operative Wheat Producers gave a luncheon at noon on Thursday, and in the evening the officers were the guests of the Leader Publishing Co. at a dinner. Later the delegates attended a theatre party as the guests of the Toronto Type Foundry Co. on Friday at noon the Saskatchewan Co-operative Elevator Company entertained at a luncheon, and in the evening the Weekly Newspaper Association gave a banquet, having among their guests Premier Dunning, Hon. R. L. J. Laing, Mayor Mason and other prominent citizens of the city and province.

At the closing session on Friday, officers for the ensuing year were elected at Regina: Hon. R. L. J. Laing, President; J. E. Garret, Signal, Watrous, Vice-President; S. J. Loran, Secretary; J. E. Garret, Signal, Watrous, Treasurer; James McDonald, Conifer, Editor; and E. C. Carter, Press, Weyburn.

From Farm To City

Excess Costs Are Double For Urban Dwellers

"Do a little figuring before leaving the old homestead for the city," is the advice of a university professor who has made a study of rural conditions. In his investigations he found that a farmer who proposes moving to town must assure himself of an income twice as big as his present one, as the highest quality of butter produced in any of the British dominions.

The exhibits from Alberta in the standard section were made under the supervision of the dairy branch of the provincial department of agriculture, which gave substantial assistance to the exhibitors in enabling them to make the long journey. It is the first time that Alberta has exhibited in the London show, and it is regarded as a unique triumph for the Alberta dairy industry that the gold medal came to this province, even beating out in competition the famous New Zealand exhibitors, which is made under almost perfect conditions.

No Need Of Exaggeration Or Misrepresentation To Attract British Settlers To Canada

Poultry Shows

Two Dressed Poultry Shows To Be Held At Saskatoon and Regina

Saskatchewan is putting on two dressed poultry shows, one at Saskatoon, December 2, and one at Regina, December 3. Excellent prizes are offered and the feature of the two shows will be that a special car will back in waiting at Saskatoon, December 2, and immediately the show is over the birds will be loaded into the car, which will proceed to Regina, arriving there just as the Regina show is concluded, picked up their birds and at once proceed to Montreal, where already certain birds have arrived to feature "Saskatchewan exhibition poultry" for the Christ market. It is expected that there will be about 2,200 birds in the car. Three years ago when the dressed poultry show was started at Saskatoon, one show case, the first contained all the birds offered for exhibition.

Professor Baker, of the university, and W. Waldron, of the department of agriculture, believe, have the grain, packing and shipping of the car in charge. The poultry show gives an unique chance to briefly but adequately observe Canada at work and play and to see the actual life of the life of the country and estimate its opportunities and possibilities. Men of the calibre of these journalists, trained in the arts of observation and interpretation, who are able to make the most of such a visit. The people of the British Isles should welcome their impressions and Canada should naturally benefit from the results of their dissemination.

British Canada Trade Speedy

For speed among the trading vessels of the world pride of place must be given to a British Canada trader, the S.S. Portland, which has accomplished the journey from Fremantle, Australia, to Swansea in the record time for a trader of 27 days' steaming time, as against the usual 35 weeks.

Turkey Buzzards In B.C.

Bird rangers at Victoria, B.C., have been mystified by the appearance of a flock of between 250 and 300 buzzards. Many say they have their homes in the southern states and are seldom seen so far north, especially in such numbers. Naturalists are at a loss to explain their presence here.

The British Isles is in constant and urgent need of information on Canada which its people can feel assured is authentic and free from bias. This should be to some extent met by the work of these newspapermen trained through years to observe and give accurately and clearly and express their opportunity to see into the workings of Canadian life. Canada has not the slightest apprehension over the conclusions they reached. It cannot be too strongly or too frequently reiterated that Canada has not the slightest need of exaggeration or misrepresentation. All she keenly desires to assure her future development is to be adequately known as she really is.

Pierce Rockies With Fine Roads

Construction of new roads is well advanced in the Canadian Rockies

The completion of the new roads, according to Col. Moore, is shaping a new era of Rocky Mountain travel particularly attractive to a large number of people who have not gone far before to enjoy mountain travel. It is so now possible, and is becoming more so, to enjoy walking trails through the very best of the mountains as a tourist resort. The beautiful country and the rugged peaks, as established by the Canadian Pacific along the roads are testing places at certain stages of the way.

The census just passed has been the heaviest in the history of the Rockies and the resulting revenue in Canada has been estimated at \$60,000,000 dollars. The percentage of American visitors has been from 65 to 75 per cent, but Canadians and Europeans have been increasing in numbers each year. Next year a bigger season will be looked for, as Col. Moore says, the time is not far off when the world will realize that the Rocky Mountains section of the Canadian West is a story Switzerland is one.

Many Entries For Dairy Show

All-Canada Competition Takes Place in Winnipeg This Year

The all-Canada dairy show, which will take place in Winnipeg, February 9-12, in connection with the Western Canada Fair Convention, is attracting entries from creameries all over the Dominion. That of a total of 15 already received, Alberta has 25, Manitoba 14, Saskatchewan 5, British Columbia 5, Nova Scotia 2, Prince Edward Island 1 and Ontario 4. The all-Canada competition was first instituted by the Manitoba Dairy Association and is now held in a different city each year. The forthcoming event will take place under the auspices of the Manitoba Dairy Association and the Dairy Manufacturers' Association.

Britain's Egg Import Bill

Last Year Amount Ran Over Seventy-seven Million Dollars

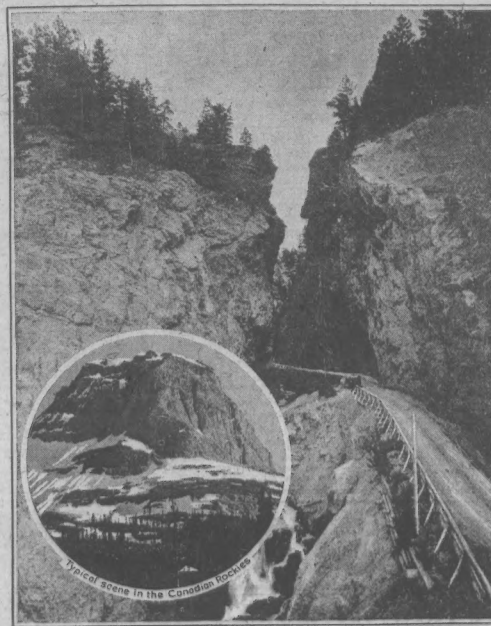

This London Daily Mail item carries on a campaign to reduce the big English egg import bill. Last year the bill for eggs imported into Britain was approximately £77,200,000. This total sum represents 2,500,000 eggs.

During the last few years there has been a notable increase in the number of laying hens kept in Great Britain, and this was a marked improvement in their productive habits.

U. S. Chicken Population

The chicken population of the United States is placed at 400,000,000 by the department of agriculture. This number, the department said, would make a procession of chickens 300,000 miles long and they could reach England in 10 days. It is said to reach from the waste to the moon and back again.

Not anything began in the garden. There's the bottomest habit.

Finest scene in the Canadian Rockies

Colonel Phil Moore, former star quarterback at Princeton and now an enthusiastic amateur and promoter of the Canadian Pacific Rockies, claims that he is no mountain scenery either in Colorado, Yellowstone Park, the Columbia Valley in Montana with the Canadian Rockies have to offer. He adds that the building of roads through these mountains and the resultant automobile traffic is a factor in speeding the development of the Rockies as a tourist resort. The beautiful country and the rugged peaks, as established by the Canadian Pacific along the roads are testing places at certain stages of the way.

The census just passed has been the heaviest in the history of the Rockies and the resulting revenue in Canada has been estimated at \$60,000,000 dollars. The percentage of American visitors has been from 65 to 75 per cent, but Canadians and Europeans have been increasing in numbers each year. Next year a bigger season will be looked for, as Col. Moore says, the time is not far off when the world will realize that the Rocky Mountains section of the Canadian West is a story Switzerland is one.

CHRISTMAS

ONCE again at this season of the year all Christendom will commemorate the birth of Jesus the Saviour of the world. Although it is now nineteen hundred and twenty five years ago that this humble birth took place, the personality and character of Christ—the man of Galilee—shines across the ages like a pillar of light, and instead of losing its brilliancy, interest and enthusiasm, grows brighter and brighter with the years.

The little babe, born in the manger in Bethlehem, came to this world to deliver a message—a message so simple yet so tremendous in its import, that it has become more luminous and more wonderful as its full meaning begins to dawn on mankind. He came to give life more abundant and to reveal the true God; to brush aside the false God of myth, of tradition, of superstition, of ignorance, of fear, and to de-throne forever the God of anger, of revenge, of hatred, of cruelty, of injustice, before whom man had so long cringed in fear and trembling. He came as the accredited Ambassador of the real God. The God of Love, of Truth, of Justice of Mercy. This was the Christmas message that came with the first Christmas gift to the world nearly two thousand years ago.

The shepherds caring for their flocks on the Galilean hills that night, 1925 years ago when "the glory of the Lord shone round about them" were "scared afraid," until reassured of the words of the angel—"Fear not; for behold, I bring you good tidings of great joy, which shall be to all people. For unto you is born this day in the city of David a Saviour, which is Christ the Lord." Then their fear fell from them, and they went as directed to find the Babe in the manger.

With the same simple faith of those Galilean shepherds, all of this Christmas season can find the same Christ.

PARENT-TEACHERS' ASSOCIATION

At the regular meeting of the School Board, held last Monday evening, the question of the advisability of forming a parent-teachers' association was discussed, and it was the opinion of the Board, the principal and the school inspector, that such an organization would be a good thing for the town.

A Thought for Christmaside

"God bless Us, Every One!" said
Tiny Tim.

MANY years have passed since Charles Dickens wrote "A Christmas Carol" with its merciless revelation of the soul-cramping power of greed for material wealth, and its glowing picture of the mental and spiritual peace that comes to those whose sympathy for humanity finds outlet in deeds as well as in words.

As never before the world about you needs the practical application of the lesson Dickens taught to teach. Everywhere, in the country side, in the village, in the town, in the city, there are Tiny Tims. There are older folks, too, sick in body, troubled in mind, oppressed with fears for those dependent upon them, almost worn out with the strain of the battle of life. Sometimes you have wondered how they managed to get along, from what source they draw their unquenchable belief in the coming of a brighter day.

To such as these a kindly thought put into action, may make all the difference between "A Merry Christmas," and one in

which the smile of courage is all too close to tears. The reunion with your own family circle and your chosen friends will be illumined by a more radiant glow if you know that in at least one homely need have been satisfied and life is renewed and saved, because of your thoughtfulness.

THERE may be others too in no want for that which money can buy, but whose souls are parched for lack of the encouragement you could give. The way will come when it is too late to wish that the friendly smile and the word of cheer had been as freely given as they were longingly hoped for. Banish false pride and cultivated apathy. Remember the story of the first Christmas, so old yet ever new. Open wide the door of your heart to its message and its glory. So shall you find the Christmas spirit hovering with you through all the days of life; so shall you always be able to say with the abiding faith of poor and crippled Tiny Tim.

"God bless Us Every One!"

—Wm. Beale

At the present time is a very that "you can fool all the people some of the time and some of the people all the time, but you can't fool all the people all the time," but our legislators don't appear to have realized as yet that "them days are gone forever."

It is quite natural that such be the case since the present unit system is something new and is liable to be confusing when carried to the parents by the pupils. For this reason the formation of a parent-teachers' association to hold regular meetings and to discuss school matters could not help but be beneficial to all concerned. A movement in that direction should be started at once.

STILL AFTER RESOURCES

When the present administration at Edmonton came into power one of its first moves was to try to secure control of the natural resources of this province. During his tenure of office, ex-premier Greenfield made several trips to Ottawa to get the matter settled. This has been going on since 1921. Presently the Liberal government also put up a bold front to get control of the resources. Now we learn that one of the first acts of the new premier, Mr. Brownlee, is to go to Ottawa to discuss again the natural resources question.

Isn't it about time our legislators got some real excuse for joy? It is about time they got their ideas to Ottawa, at the country's expense. There was a time when P.T. arm could have said with some degree of accuracy that "you can fool all the people some of the time and some of the people all the time, but you can't fool all the people all the time."

Whenever possible, an attack of common sense should be put out at the beginning. Fasting or indulgence rarely pays. Extreme corporal punishment on the other hand is often a mistake. To ignore the attack or to put the child to bed, is sometimes the best remedy.

Children who had had it may be broken by pointing out that anyone who loses his temper makes a fool of himself; loses his dignity and is ridiculous and sometimes a respectable child to bed, is sometimes the best remedy.

The Review congratulates the Hanna Herald on the very excellent Christmas number it issued last week. It is one of the finest Xmas numbers we have seen turned out of a weekly newspaper office in many years and reflects great credit on the town as well as on its editor, Herb McCrea. The edition is most artistically laid out and splendidly printed in magazine form.

Holmen men are apparently keeping themselves well posted on business conditions. Down in Winnipeg they are now leaving the banks alone and instead are holding up the Vendors. Another proof that Christmas is drawing near.

Health Talks

By Dr. C. M. Hieck, Medical Director,
Canadian National Committee
for Mental Hygiene.

CONQUERING HOT TEMPER

Children ought to have the opportunity of learning to control outbreak of temper. Do not shield and protect them from friction. They will meet it in life's life and conquer it is a sort of "rule" to teach them to master themselves. They should learn before they are a year old that crying and fits of temper will not get them what they want. Teach them that control and not temper will win their desires.

"MAKE IMMIGRATION HUMAN" SAYS
C. P. R. PRESIDENT; SIR THOMAS
WHITE PAYS HIM HIGH
TRIBUTE

E. W. Beatty, C.P.R.
Commissioner from West of the C.P.R.

Addressing the Associated Boards of Trade banquet at Winnipeg recently, E. W. Beatty, Commissioner of the Canadian Pacific Railway, said that one of the most significant facts of the conference was the desire of men from all parts of Canada to discuss the country's problems from an economic and national point of view, free from the bewildering influence of political partisanship. "This," Mr. Beatty said, "leads me to the inevitable conclusion that the question of Confederation on the principles of national unity which guided the fathers in establishing it cannot be solved by political manipulation, but only by that mental attitude which comes from understanding and is the result of honest education."

Sir Thomas White,
former Federal
Finance Minister.

In order to achieve national prosperity, Mr. Beatty advocated an extensive immigration policy to supply the man power necessary for the "largest undeveloped country in the world." "If I had any suggestion to make in relation to this question of statistics and place it in the field of human relations. We are apt to forget that the people who come to our shores are not only many hundreds or thousands of British or Continentalists with or without settlers' effects. They are human beings, members of families who have found themselves up from old homes, homes in some cases centuries old, to come and live in Canada, to be neighbours. If we are going to be neighbours, and to become good citizens if we only hold a welcoming hand."

We realize how great the wrench must be when we learn that some bring with them a handful of earth so that when the time comes for them to die in Canada it may be scattered over their coffin. I wonder how many Canadian families who have been in the United States, have ever thought to carry with them a handful of Canadian soil. No immigration scheme for Canada can achieve success unless due allowance is made for such human factors."

On the same occasion Sir Thomas White, former Federal Minister of Finance, paid a high tribute to Mr. Beatty. Sir Thomas said that he had always looked upon Mr. Beatty as a representative Canadian who typified the qualities which are to be found in true Canadians. Mr. Beatty had carved his own niche in Canadian affairs and had made his own way in the world as in the manner of Canadians. As president of the Canadian Pacific Railway, Mr. Beatty occupied one of the highest positions in the Dominion and was absolutely unspotted by any enormous success, and Sir Thomas liked to think that in this the former was also a characteristic Canadian.

Referring to the improvement of the Canadian Pacific Railway, the former Finance Minister pointed out that the history of the Dominion and the progress were intertwined and could not be dissociated. The Canadian Pacific Railway had stood as the type of exemplary Canadian enterprise and courage in the face of apparently insurmountable obstacles. Sir Thomas also commended favorably the good work the Canadian Pacific Railway had done during the Great War, and later on in going ahead with the re-organization of the Government. In order to give employment to soldiers who were returning after the war.

Interesting Local Items

Mrs. W. S. Jones left last night for
Carmichael to spend Christmas with
her daughter, Mrs. L. M. Reid.

It is rumored that a lady barber
and hair dresser is soon to open a
shop in Redcliff.

Rebels' closed yesterday for the
Christmas holidays. It will open
again on Jan. 4th.

Newly elected officers of the local
Masonic Lodge will go to Medicine
Hat on December 28th to be installed.

W. King, of Medicine Hat, has en-
tered the Calgary Herald road race,
which takes place on Christmas day.

Tuesday of this week was the short-
est day of the year, the day on which
the sun is farthest from the earth
and the hours of daylight fewer.

Bill Yates and Ross McLaughlin left
on last Monday's train for Vancouver
where they will spend the Christmas
holidays.

The recent falls of snow have made
it so cold and feel more like Christmas.
For the past two months the weather
has been more of the 24th of May kind.

The first of births at the maternity
hospital, Medicine Hat, as reported
in the News, supports the birth of
a daughter to Mr. and Mrs. Ernest
Wilke of Redcliff.

Mrs. Ed. Milford and two daughters
accompanied by Louie Milford, left
last week for Virginia, where Mrs.
Milford will visit her husband who is
already located in that state.

The clerk in the Cash Hotel, Medicine
Hat, was held up by a masked
man last Saturday morning at 9:30
and was relieved of \$24 taken from
the cash till. The holdup man had
a 22 rifle.

An effort is now being made to
raise the water level at Elbowwater
lake. If this can be accomplished the
appearance, convenience and recrea-
tive of this summer resort will be
greatly improved.

Andy Mayne of the Block district
sent a few days in town this week
on his usual rounds delivering Xmas
presents to the girls. He wishes to
remind the girls if he has visited any
of them that he will be back next week.
Rich McCarty will deliver next week.

Proctor Division of Saskatchewan,
told a delegation from the Medi-
cine Hat, that the school will have
no changes made in the lower part
of that province but that the new
system had not yet been given a
long enough trial.

His many friends in and around
Redcliff will be very sorry to learn
that C. S. Pingle has been partici-
pated at his home in Medicine Hat, last
Saturday his condition was critical
but he has improved much during the
past few days.

The Strathmore Standard issued a
Christmas number last week which
was a credit to the town. The
merchants are evidently pre-
serving in memory the fact that
the review is possible for a
little extra effort on the part of the Editor
at this season.

Taking steps in the United States
toward a greater recognition of clean
fishing and the need of con-
servation of fish, game and forest
resources, Ozark Ripley, of Tennes-
see, editor of Field and Stream, Out-
door Life, Outing, announced at
Montreal recently that catching game
fish with worms had been banned
in practically all states of the re-
public. Worm fishing is considered
destructive as small fish returned to
the water are too badly wounded
to live.

Sugar beet production in Canada
is increasing on a phenomenal scale
while the value of refined beet sugar
has increased about 100 per cent. In
1925, for 1924, 21,111 acres were
planted to sugar beets yielding 295,
177 tons of beets, from which 85,
775,000 pounds of sugar was refined
with a value of \$1,193,245. In 1926
there was a yield of 189,230 tons of
beets from 17,241 acres. The value
of the 29,426,100 pounds of sugar
refined was \$2,745,200.

One hundred thousand dollars
worth of Black Fox puppies were
shipped to Antwerp on the Canadian
Pacific line "Medlar" recently. In
specially built cages they will be con-
veyed by the Dominion Express
across Europe to the farm in Swit-
zerland where they will form the
nucleus of a fox-breeding establish-
ment.

WE WISH OUR

Customers & Friends
A Very Merry
CHRISTMAS

AND IN WISHING YOU
A HAPPY NEW YEAR

Would take this opportunity of
thanking you for past patronage
and to assure you you will
always get fair treatment and
satisfaction when buying clothing
at this store.
